

# Stephanie's Story

## Dental Services in Trafford

Shared in February 2023

Stephanie is a 69 year old lady who suffers from Cerebral Palsy and Osteoporosis. She leads a full and enjoyable life living independently with some slight mobility issues.

As her mobility worsened, Stephanie began finding it difficult to access the facilities at her regular dentist. In 2017, she was referred to the Community Dental Service in Trafford. Stephanie has since been a regular attendee at the Community Dental Service and has now met most of the Trafford Dental Team who have built up a good relationship with her. Stephanie enjoys and looks forward to her dental visits and chatting with the staff.

She feels able to access the clinics easily and says that the whole dental team have always accommodated her needs, giving her extra aids during appointments to make her more comfortable and giving her plenty of time to take a rest and stop if she needs to. Stephanie lets staff know in-between visits if she has had any problems and is grateful for any advice to keep her teeth and oral health well.

Stephanie explains how grateful she is to all the members of staff in the Trafford team as they are all very warm, welcoming and very professional.
